

FOCUSED ECO COLORS

Reused Compound Records with focused colors now available.

The compound is derived from QC rejections and flash from prior pressing. Dedicated reused colors with a focus on a high content of recycled material. Except black, all colors will be similar to marbled and may shift in the color group based on what is available. Sound quality is in line is 1/c vinyl.

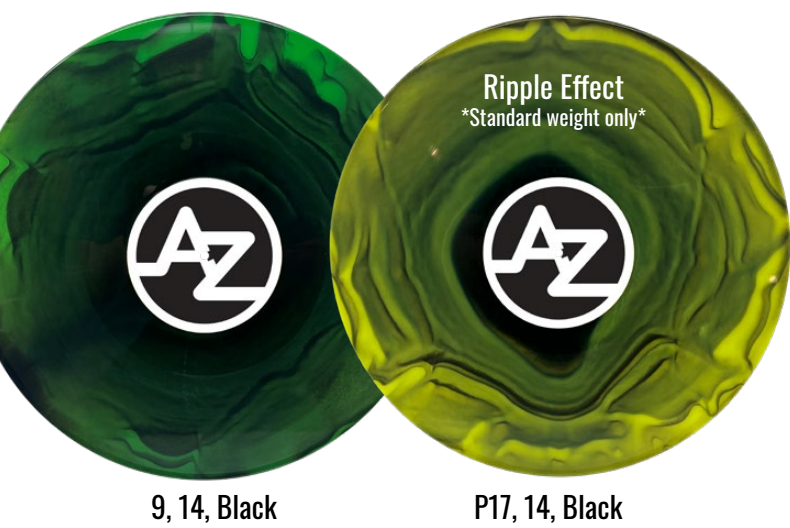

NEW BLENDS

Our catalog of color blends has been updated. Choose from a wide selection of eye-catching color recipes.

BIO-ATTRIBUTED VINYL

PVC produced using non petroleum based materials

- Realize a CO2 savings when compared to traditional PVC production
- ISCC Plus Certification
- No impact on sound quality.

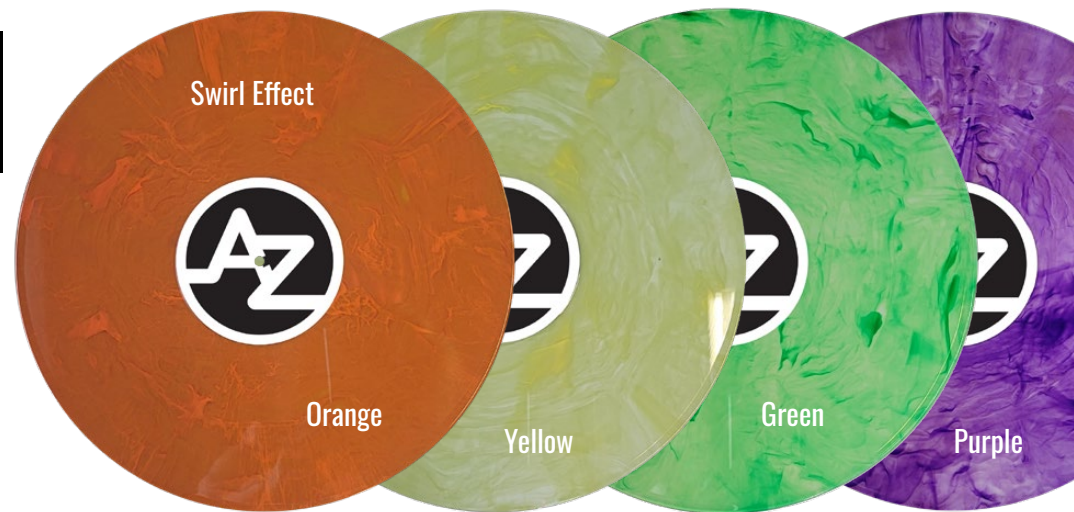

NEW & EXCLUSIVE EFFECTS IN TESTING

We're trying out some new mixes!

Contact your sales rep to explore color options.

If you have an idea for a new color effect, send it along and we will look into!

NEW HALF / HALF OPTIONS

Half w/ Splatter
Apply Splatter to only one side of the record.

Half & Half w/ Center Color
Customize with a third center dot color.

GLITTER VINYL

Glitter options are now available

Glitter can now be added to any transparent color.

It can also be used in effect vinyl recipes.

A TO Z OFFERS A VARIETY OF COLOR VINYL AND EFFECTS.
YOU CAN MIX AND MATCH COLOR COMBINATIONS TO CREATE A UNIQUE LOOKING RECORD.

* N3 CANNOT BE USED IN EFFECTS

* PREMIUM VINYL COLOR, additional costs will apply.

PLEASE NOTE: PMS COLORS ARE A CLOSE APPROXIMATION AND FINAL RESULTS MAY VARY. Vinyl PMS colors will not match printed part PMS colors exactly.

P12 - BASE

P8, 4, P12 - SPLATTERSP15 - BASE
3, 2, 5 - SPLATTERSP9 - BASE
P3 - SPLATTERS10 - BASE
3, 4 - SPLATTERS

There is limit of **7** colors to be used with one Splatter effect. Splatter can be applied to many other vinyl effects. You cannot use splatters with many of the effects: Picture Disc, Galaxy, Quad, Twister, Marble, Golden Nugget.

PLEASE NOTE: Splatter is completely random – every record will look different.

Splatter is not available on Heavyweight 7"

TIPS:

- If you want a stronger contrast between the base and splatter color, we recommend choosing the base color from our transparent color range and the splatter color from our solid color range.
- Transparent splatter colors are nice, but not when selecting a solid base color (they will usually disappear when being pressed).
- There are an endless amount of base color and splatter color combinations – so go wild and choose something that suits your record or cover artwork best!

P1 / P3

P2 / P16

P2 / 3

P3 / 12

P17 / P20

The A side/B side effect can be made from a combination of **2** or **3** colors.

The result is completely random on both sides of the record.

We recommend choosing high contrasting colors for maximum effect.

Opaque colors are recommended for this effect.

P14 / 2 / P11

1 / 5 / 3

4 / BLACK / 1

The A side/B side effect can be made from a combination of **2** or **3** colors.

The result is completely random on both sides of the record.

We recommend choosing high contrasting colors for maximum effect.

Opaque colors are recommended for this effect.

3 - CENTERP15 - BASE
N5 - CENTER

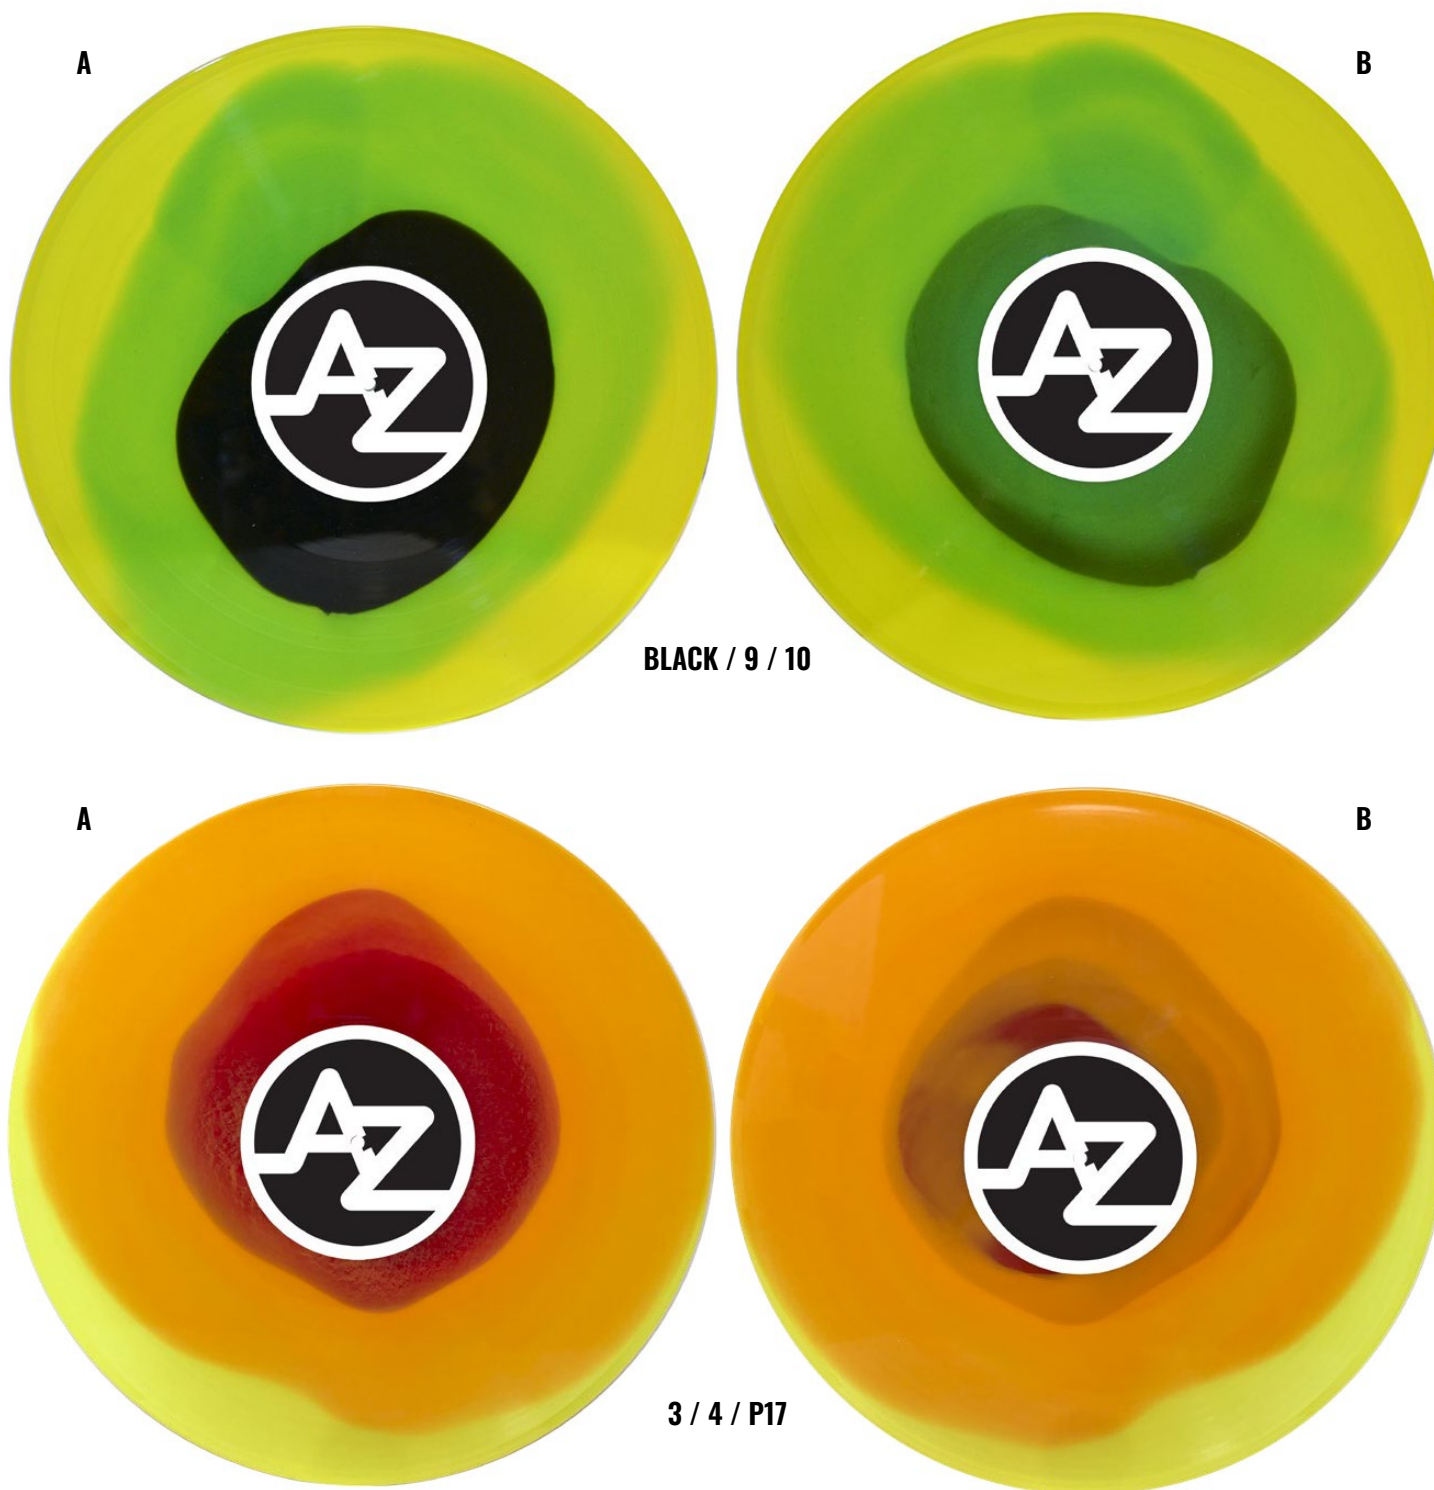

Color in Color vinyl is made by pressing one color inside of another.

This can also be made with **3** colors for a 'Color in Color in Color' effect.

PLEASE NOTE: The final effect depends completely on the colors you choose, we cannot guarantee that the smaller center color will always be visible on both sides of the record.

TIPS:

- For the best possible results choose highly contrasting colors.
- A transparent base color with an opaque center color is recommended.
- The 3rd color is typically only visible on 1 side if used.

Color in Color vinyl is made by pressing one color inside of another.

N2 - SPLATTER

There can be 3, 4, 5 or 6 spokes used with the Cornetto effect.
These can be made from a combination of both transparent and solid colors with a maximum of 2 colors.

COLOR/EFFECT WILL BE RANDOM

Eco Mix is a completely random color made from leftover pressings.
You will not know which color or effect your record will have.

While there is some variation between each record, the color is mostly consistent throughout a single pressing.

Eco Mix - Reused Compound Records with focused colors

Records will be made with a high percentage or completely from compound previously used to press records. Final color will depend on the availability of recycled compound at the time of production. If you would like a 100% reused only record please note this - lead times vary based on availability of the requested color. The compound is derived from QC rejections and flash from prior pressing.

*** ECO certification: The manufacturer will be able to provide declaration of the ECO nature of the product.**

Sound quality for colors is similar / same as a traditional 1 color record.

Colors will be marbled and random but focused on the color group selected and the available colors at the time of manufacturing.

We cannot guarantee the final appearance of the Eco Color records. The Colors may also shift during the course of a run depending on the size and availability of the requested compound.

3 / P15

P5 / P8

3 COLOR
P19 / BLACK / P8

P16 / 13

The Galaxy effect can be made from a combination of 2 colors and results in a completely random effect.
PLEASE NOTE: Using 2 transparent colors is not recommended as the effect will not be visible.

Glitter can be used in other vinyl effects on a case by case basis, please check with your sales representative.

9 (EMERALD GREEN)

10 (YELLOW)

P25 (VIOLET)

P26 (BLACK ICE)

Glitter can be added to any transparent vinyl color. This effect will not work well with opaque colors. It is also possible to use glitter with multi color effects. Please confirm any glitter color mix options with your sales rep.

Glow in the Dark records are made using transparent clear vinyl.
The result is a milky clear color in the daylight, and a neon green glow at night.
Sound quality is affected when using this effect.

SB Blends are pre-defined 'smoke' recipes for the marble effect.
Results vary by press. Images are not backlit.

For the Moon Phase effect, choose a light transparent base color and contrasting second color (transparent or solid).

GOLD NUGGET

SILVER NUGGET

Nugget vinyl available in colors shown only, not available for effect vinyl.
For a more vibrant option check out color mixes (HB Blends) HB01 and HB02 which use high melt colors

The Quad effect is composed of 4 segments with **2** or **3** different colors.
In case of 3 colors, please specify which color will be used twice.

9, 14, BLACK

P17, 14, BLACK

Only available as 12" Standard 140 Gram
The effect should be possible with combining all colors both transparent and solid but it is still being tested.
Running a color effect test is recommended for new combinations.

10 / P10

14 / 13 - BASE
1, 14 - SPLATTER

For the Spinner effect, choose a light transparent base color and contrasting secondary color (transparent or solid).

Splatters can be applied to the secondary color only.

PLEASE NOTE: the color of the three thin triangles is the base color.

ORANGE SWIRL

YELLOW SWIRL

GREEN SWIRL

PURPLE SWIRL

Other color combinations may be available, please discuss options with your A to Z representative.
Color testing is recommended on new blends.

2 / BLACK / 1

1 / 3 / 13

4 / 7 / 3

The 3 Color Segment effect can be made with a combination of any solid or transparent color.
Each colored segment is approximately 120°.

The 3 Color Striped effect can be made with a combination of any solid or transparent color.

14 / P12

11 / BLACK

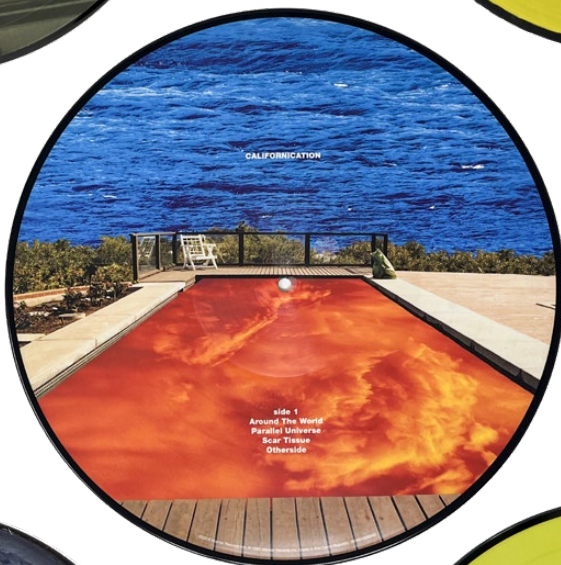

3 / BLACK

For the Triple Button effect choose a light transparent base color and contrasting second color (transparent or solid).

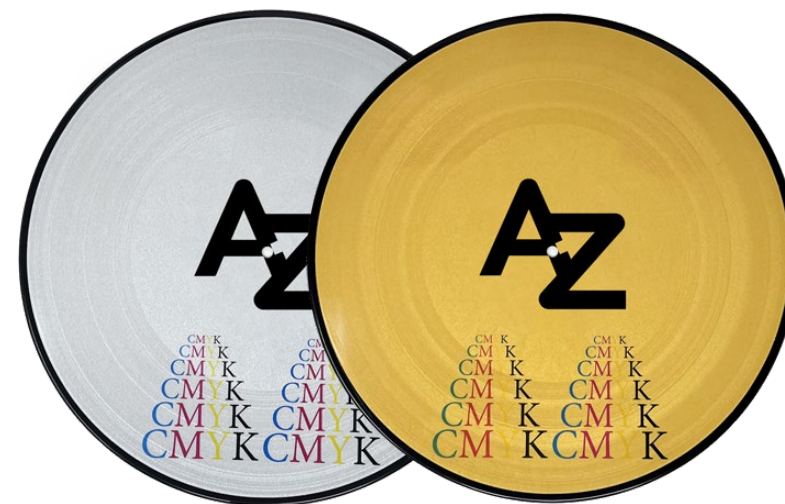

The Twister effect is composed of 4 segments, using **2** or **3** different colors.
PLEASE NOTE: You must define order of colors if choosing **3** color Twister.

SHAPED LABEL INSIDE CLEAR DISC

METALLIC PRINTED SLICK AVAILABLE*
CAN BE PRINTED WITH OR WITHOUT WHITE INK UNDERBASE

*AVAILABLE IN 12" ONLY, LEAD TIMES VARY.

Picture discs are vinyl records which have a printed label on both sides.

The grooves are pressed into a plastic foil that covers the surface of the record.

Picture discs can be cut into simple or complex shapes.

*There is a slight shifting between the two labels on each side of the record that is visible from the other side, using an opaque color for the core can hide this but it will also shift slightly against the cut edge and the printed edge in production, the tolerance of this shift is 5mm.

Picture discs are vinyl records which have a printed label on both sides.

The grooves are pressed into a plastic foil that covers the surface of the record.

Picture discs can be cut into simple or complex shapes.

*There is a slight shifting between the two labels on each side of the record that is visible from the other side, using an opaque color for the core can hide this but it will also shift slightly against the cut edge and the printed edge in production, the tolerance of this shift is 5mm.

There are two categories of shaped vinyl – **Simple** and **Complex**.

Simple shapes include squares, rectangles, ovals, triangles and basic polygons.

Complex shapes are custom, limited only to the scope of your creativity.

PLEASE NOTE: Deeper cuts reduce the playable area – please check your design with A to Z in order to confirm production possibilities.

STANDARD SCREEN PRINT

RASTERIZED PHOTO PRINT

WHITE INK ON BLACK VINYL

BLACK INK ON WHITE VINYL

Any solid or transparent colored vinyl can be silk screened.

PLEASE NOTE: Artwork must be supplied as solid 1 color vector or bitmap art - gradients and Pantone scale color cannot be printed.

*Full sized or mini LP labels (33mm) are required on both sides of the record, including the printed side.

An etching can be placed onto a blank side or blank area of your record.
Usually, there are no grooves containing music/sound on the etched side of the record.

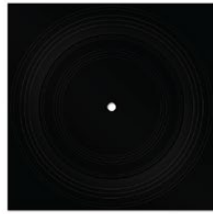

We can now print on vinyl with exceptional quality using new technology.
We print in CMYK (on the side without grooves) and either with, or without, the white background to achieve the best result.

Flexi discs and Flexi postcards are media carriers based on the same principle as a vinyl record.

The material used for the production of Flexi discs is a PVC foil, and Flexi postcards are made of printed cardboard.

All flexi discs and postcards have a higher surface noise and they do not possess the same audio quality as standard vinyl records.

Other finishes are available, please discuss specific requests with your sales representative.

PLEASE NOTE: You are viewing digital photos/a simulation of the appearance. Varnish may look different on monitor than on the final printed product. If this is a concern, please contact us regarding physical varnish samples.
